About me

As a Full Stack developer, I have gained solid skills in both Front-End, primarily working with React, and Back-End, utilizing Node.js and Python.

Although I began my professional career in a different industry, specifically in Industrial Robotics, it provided me with insights into the programming world, leading me to make a professional transition. My commitment to continuous improvement motivates me to consistently expand my knowledge and make valuable contributions to the field of web development.

I consider myself a problem solver, as evidenced in my career by tackling challenges such as industrial process automation and self-directed learning to address issues in unfamiliar areas.

Skills

PROGRAMMING SKILLS

- JavaScript / TypeScript
- Python

FRONTEND

- HTML5
- CSS / Sass
- React
- NextJS
- Angular
- Tailwind
- Astro

BACKEND

- NodeJS
- Django
- Sequelize
- Express
- MySQL
- MongoDB

Languages

- Native Spanish
- Native Valencian
- Intermediate Inglish
